

David M. Belczyk

partner

David is a mechanical engineer and former assistant district attorney who has successfully litigated complex matters before federal and state trial courts and the federal appellate courts. He has tried numerous matters to jury verdict and has broad experience at all stages of litigation. He represents high-profile clients in matters of national and international scope.

David's practice has included national and international litigation related to allegations of design, manufacture and installation defects, performance specifications, construction, project management, delay and disruption claims, supply chain and logistics issues, and other engineering matters. David's commercial litigation experience also extends to large international arbitrations, defense of class actions, False Claims Act defense, government investigations, CERCLA, consumer litigation and proactive counseling to reduce or avoid claims. David also served as a clerk with the Seventh Circuit for two years.

David has managed the development and presentation of crucial expert testimony related to structural, electrical and mechanical engineering, construction methods, metallurgy, chemistry, project management, damages and forensic accounting. He is a member of the Engineering Society of Western Pennsylvania. As an undergraduate researcher, he contributed new findings to the field of fluid mechanics.

David is a member of the board of directors of Pittsburgh Opera. He was also an adjunct professor at Duquesne Law. David has committed to providing pro bono legal services to a variety of underserved populations. He has helped to save an asylum claimant from deportation, successfully pursued civil rights claims, mediated prisoner disputes, supported veterans with diverse legal needs, observed demonstrations in defense of the First Amendment and helped with legal issues surrounding artistic exhibitions.

REPRESENTATIVE MATTERS

- Litigation concerning the international supply of allegedly defective products
- Disputes related to supply chain and logistics in specialty services and raw material industries, including complex questions under the
